When you truly need to know

SOLUTION BRIEFING

ATO Protect Account Recovery+ for Microsoft Entra ID

Prevent workforce identity impersonation, account takeover, and the social engineering driven by GenAI deepfakes.

For Entra ID customers, ATO Protect now offers a module for self-service account recovery. It uses Trusona's Identity Impersonation Detection to recover a user's account or reset their password without calling the help desk.

Why is this better than what I do now?

- No need to download the Authenticator Mobile App
- No need to pre-register the users
- No need to call the IT Help Desk or your manager
- Included free in the ATOP Enterprise Suite
- Available 24x7
- Secured by Trusona

Trusona's Account Recovery Solution solves it:

Trusona verifies the person against authoritative records, including DMV, in real time. No app to install. Nothing to pre-register, so the check works the first time a user ever needs it. Trusona mints a single-use Temporary Access Pass, and sends it to the verified number by SMS. Nobody had to judge a voice, because there was no voice on the line.
